

# MCP AI for Privacy and Compliance

Most AI tools generate content. Responsum works with your governance data, respects your permissions, and helps your team take controlled action in the systems you already use.

- ✓ Turn governance data into instant action
- ✓ Surface risks faster
- ✓ Reduce manual compliance work
- ✓ Maintain full control and oversight

## Turn governance data into action

Responsum connects directly to your governance environment, helping teams complete privacy and compliance work faster while improving visibility and control.

### Eliminate manual compliance work

Stop chasing stakeholders and manually updating records. MCP AI uses your governance data to speed up reviews and documentation.

### Gain instant risk visibility

Surface hidden compliance gaps and risks, with a clear view across processing activities, vendors, controls, and assessments.

### Reduce complexity for teams

Give teams instant access to the information they need, without searching across disconnected systems and records.

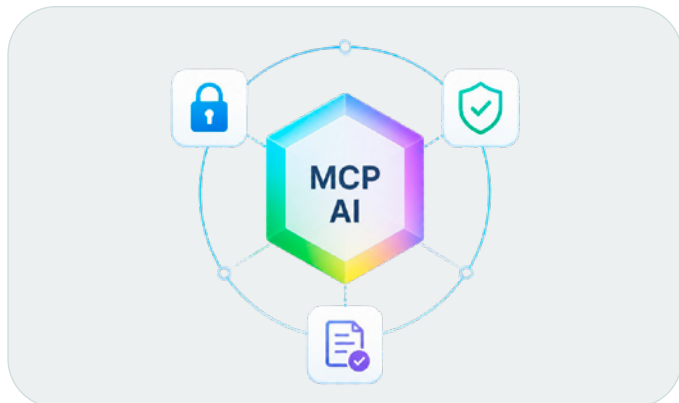

### Accelerate adoption and engagement

Guide onboarding, complete incomplete records, and encourage consistent governance practices across the organisation.

## AI that understands governance, without losing control

Responsum MCP AI works directly with your governance environment while maintaining the controls, permissions, and oversight required for compliance operations.

- ✓ Access only authorised data within your Responsum environment
- ✓ Respect existing roles, permissions, and approval workflows
- ✓ Validate changes before they are applied to governance records
- ✓ Keep humans in control of governance-critical decisions

### Seamless migration from any tool

- ✓ Onboarding and migration typically completed within 1 day to 8 weeks, depending on complexity
- ✓ Compatible with any setup, whether you're switching from Excel, OneTrust, or another tool
- ✓ Included in all pricing packages, with hands-on employee training to ensure a confident start
